Re: Registry Request #2010011, Additional equitable allocation options for .MOBI one and two character domains

Dear Caroline,

ICANN has conducted a preliminary review of mTLD's request for additional equitable allocation options for .MOBI one and two character domains, in accordance with the Registry Services Evaluation Policy and process set forth at <http://www.icann.org/registries/rsep/rsep.html>.

Based on the information provided, ICANN's preliminary review did not identify any significant Competition, Security or Stability issues. As noted in the proposal, implementation requires a modification to the .MOBI Registry Agreement (signed 10 July 2005). We will be in touch with you shortly regarding the process for posting of an appropriate amendment for public comment and consideration.

Please let us know if you have any questions.
