Dear President Marby,

This is a request to ICANN to create a top level domain name for the world wide cycling industry.

I have created the cycling company Entertainment Cycling. Entertainment Cycling is a cycling league where professional cyclists can compete in professional cycling races in America. The company will host 45 national races annually and the league is open to the international community.

The anticipated interest in owning a cycling team is expected to be extremely high. So I am requesting the Internet Corporation for Assigned Names and Numbers to create the top level domain name .cycling immediately for the world wide cycling industry. The immediate and mass purchasing of the top level domain name will demonstrate the highly anticipated interest in Entertainment Cycling and the top level domain name. The world loves cycling. It really is a way of life for the majority of the world.

Finally, I look forward to ICANN creating the top level domain name .cycling for the world wide cycling industry.

Thank you.

Sincerely,

Terence Ashley
